## Warming Blankets & Wraps

Maintaining patient normothermia in the OR is of paramount importance as studies show the risk of complications can increase when patients become hypothermic. Even mild hypothermia can affect patient outcomes. Our line of temperature maintenance products is designed to assist with the preservation and monitoring of patient temperature.

**Passive warming blankets and wraps use a combination of materials to help maintain normothermia through thermal retention.**

- Cost-Effective Alternative To Active Warming
- Three-Layer Warmth - 20% Better Insulation Than Cotton Blankets
- Allows Easy Access To Surgical Site
- Individually Shrink-Wrapped
- Single Patient Use
- Latex Free
